Lee-Ming Department of Information Technology

The Department of Information Technology at Lee-Ming Institute of Technology was formerly known as the Department of Computer Science and Engineering which since from 1993. The Department owns seven full-time teachers, who are committed to the field of information technology research and teaching work. Since its inception, this department has mainly cultivated information technology professionals, in addition to providing the basis of curriculum theory, and to strengthen the interaction between students and industry. Whether it is teacher structure, curriculum design, teaching methods or student life and academic counseling, the Department of the student's rights and career development as the focus, the relevant measures were described later.

Since the foundation of the school, we have established the aim and core values of "Honesty, Simple, Simplify and Industrious" as the motto and the core value of the school, and to cultivate the basic qualities such as dedicated gregariousness, service enthusiasm, innovation and integration, Creative skills, "and" engineering services ". In addition to teaching students in all areas of basic courses and knowledge, but also supplemented by professional practice courses, through the industry practice and practice, So that students can fully familiar with the professional skills required for the workplace, after graduation can immediately face the challenges of work. Based on the school education objectives, the Department aims to "cultivate modern information technology professionals with information and professionalism".
